Section Two: ‘Essential Questions’ to Guide Student Discussion

Students benefit from having ‘essential questions’ posed to them as they watch a film of this magnitude, or engage in research/inquiry into any historical topic. Essential questions (a term championed by the Coalition of Essential Schools) encapsulate the ‘big pictures’ of students’ study of history.

Some possible essential questions to pose to students before, during and after viewings of this film:

- *Is war necessary? If so, when? If not, why not?**
- *How do different people experience war?**
- *Is war about actions or about feelings?**
- *How should we honor those who are killed in war? What is the purpose of a war memorial?**
- *How should people protest against war?**
- *How can people protest against war *and* also support soldiers?**

Supplemental questions regarding enlisting into the military:

- *What were the reasons given for enlisting?
- *At what age did the soldiers enlist?
- *In looking back, did the soldiers have regrets? Why or why not?
- *What might be considered good reasons or not good reasons to enlist?
- *Why do you think statistics bear out that 37% of first time enlistees are 17 and 18 year olds?"

Also: the content standards for your grade level and state can be adjusted to create essential questions to guide learning and viewing.

Section Three: Glossary and Vocabulary-Building Activities

Glossary of terms:

-Abu Ghraib- a city about 20 miles west of the center of Baghdad in Iraq, just north of Baghdad’s international airport. Also the cite of a notorious prison where former Iraqi president Saddam Hussain held political dissidents. Since 2003, the prison, now under

the control of the U.S. military, became famous for being the location of torture and abuse by U.S. Army reservists against Iraqi prisoners.

-Anthrax vaccination- Vaccines are part of a preventive regimen before, during and after deployment. Soldiers are vaccinated against several common infectious diseases, including Anthrax, which is a bacterial disease. The Anthrax vaccination is automatically given to soldiers without adequate testing or consideration of side effects or allergic reactions. There are have deaths and severe illnesses associated with this vaccination.

-Arlington West- Arlington National Cemetery is a burial ground for soldiers killed in active duty. Arlington West is a temporary remembrance on the Santa Monica beach put up by the Veterans for Peace, in remembrance of the soldiers killed in Iraq.

-ASVAB- the Armed Services Vocational Aptitude Battery, or ASVAB, is a multiple-choice test administered by the U.S. military to determine high school students' qualifications for military service. Often administered as a "career interests" test, often not advertised as a military-sponsored exam, and often given as a mandatory test to high school students. See also: **MOS (Military Occupational Specialty)**

-AWOL- (Absent WithOut Leave) Most often known as desertion from the military after signing the military contract. Soldiers fled the country, and as many as 4,000 in the Vietnam War went to prison.

-Conscientious Objector- a person who, for religious/ethical/moral reasons, refuses to serve in the military or to participate in armed conflict.

-Depleted Uranium- the U.S. military uses depleted uranium in some armor-piercing shells and bullets and in tank armor. If depleted uranium enters your system, it can cause permanent damage to your kidneys, or lesions on your bones and liver.

-Downing Street Memo- sometimes referred to as the "smoking gun memo," it is a summary of a July 23, 2002 meeting of high-level British Labour Party officials. In it, the author reports that President Bush wanted to instigate a war against Iraq, and that "the intelligence and facts were being fixed around the policy" of instigating this war.

-Friendly Fire- death from one's own troops. Friendly fire may have been responsible for as many as 15 percent of all American casualties during the last century.

-IED- Improvised Explosive Devices are also known as blast mines targeted to personnel or vehicles. It has been estimated that nearly half of all U.S. deaths are the result of roadside bombs.

-"in country"- a military slang term, meaning "in the country where war is being waged"

-Military Contract- A legally binding document which specifies the laws, regulations and military customs which enlistees cannot change, but which Congress can change at any time. Section C. 9B states, "laws and regulations that govern military personnel may change without notice to me. Such changes may affect my status, pay, allowances,

benefits and responsibilities as a member of the Armed Forces REGARDLESS of the provisions of this enlistment/reenlistment document.”

-Military Draft- Mandatory enlistment into the military based on age, physical and mental health. Deferments and exemptions have been granted to conscientious objectors in the past, based on moral convictions.

-MOS Military Occupational Specialty- as determined by the ASVAB test (Armed Services Vocational Aptitude Battery) the admissions and placement test for the US military. Infantry positions in the Army and Marines are engaged in direct combat, and require the lowest scores on the ASVAB.

-Post Traumatic Stress Disorder, PTSD- is a psychiatric disorder that can occur if you experience or witness a traumatic event such as a killing. PTSD sufferers often relive the experience through nightmares or flashbacks. They have difficulty sleeping, feel detached or estranged. Money for school: –Montgomery GI Bill- military recruiters state that the military pays up to \$70,000 for college. The reality is that 57% of those who sign up for the GI Bill do not receive the benefits, and 23% receive only half their maximum benefit. This is because there are many strings attached to eligibility (including a nonrefundable deposit of \$1200 as stated by Mr. Suarez del Solar). Benefits received, don't pay enough to cover costs at even the most inexpensive schools.

-Cindy Sheehan, 'Gold Star Mother'- became a prominent anti-war activist after her son Casey was killed in the war in Iraq. She was on 350 front-page news stories around the world when she went to Crawford, Texas to meet with the president but was refused an audience. **Arlington West** is one of Ms. Sheehan's first appearances on film discussing her son's death.

-Stop-Loss Policy- also known as the “backdoor draft.” This U.S. military program involves the involuntary retention of troops beyond their previously-agreed-upon term of duty. The policy was created after the U.S.'s war in Viet Nam, first significantly used during the Persian Gulf War in 1990, and a common instrument of re-deployment during the 'war on terrorism' since 2001.

One possibility for using **Arlington West** as a vocabulary-building tool: students can look for evidence in the film of different emotions felt by the interviewees.

The key emotions (or values) expressed by interviewees include: empathy, pride, sacrifice, grief, disillusionment, fear, loyalty...

After discussing the meanings of these 'emotion/value words,' students could look for evidence of one or more of these emotions/values as they are expressed by interviewees in the film. Students can also look for evidence of peoples' mixed emotions when discussing war.

.....

Section Four: Note-Taking Strategies

How do we help students to organize their impressions of *Arlington West*? Some suggestions:

***A ‘words and thoughts’ graphic organizer:** Similar to an ‘open mind’ graphic organizer, students draw an outline of a person’s head on their paper. Students should leave space around the outside of this ‘open mind’ drawing for dialogue bubbles. Students choose one person from the film. In the dialogue bubbles, students write what their chosen character says. Inside the ‘open mind’ outline of the person’s head, students use pictures/words/statements to express what that person could be thinking and feeling.

***An emotions/evidence chart:** Students create a two-column chart. On the left side, students list key emotions felt by the interviewees. In the right column, students record notes (quotes, summaries of interviewees’ testimony) that relates to each emotion listed directly to the left.

***An ‘essential questions’ graphic organizer:** In the middle of their paper, students copy an essential question, and then draw a circle around the question. In bubbles emanating from this center circle, students record notes that help answer this question (quotes or summaries of testimony).

Or: the class could list several possible answers to the essential question *before* watching the film. Then, each ‘bubble’ is ‘headlined’ with a possible answer to the essential question, and students write notes in the bubbles corresponding to that answer to the question. Now, each ‘bubble’ features an answer to the essential question, along with some evidence from the film that supports that answer....perfect for writing a ‘body paragraph.’ Several ‘bubbles’ could be combined to create an essay that answers the essential question from different points of view.

.....

Section Five: Student-Centered Activities Related to *Arlington West*

We know that students learn best when they are challenged to apply their learning in interaction with other learners. Some suggested activities:

***Character dialogues:** Students could select different people shown in *Arlington West* and create a dialogue between their characters. Students, in character, could be asked to answer essential questions from their character’s point of view in various configurations: in pairs (out loud or on paper), in small group discussions, in a ‘talk show’ format where a panel of characters holds a discussion and answers questions from the ‘audience,’ in a debate format, or from a ‘hot seat’ where one student is placed in front of the class and asked questions.

Also: before viewing the film, students could look at excerpts of interviews from ***Arlington West*** to familiarize themselves with the voices of the interviewees. Alone or in groups, students could be given ‘sentence strips’ with excerpts from the film, and then answer questions from Section One of this curriculum guide. A transcript of the film can be found on the ***Arlington West*** website: www.arlingtonwestfilm.com Simply “copy and paste” excerpts from this transcript.

***Time Machine dialogues:** based on the ‘character dialogue’ model above, students could be challenged to interact, in character, with people already studied in their history class. This is a great way to make connections between various people and events studied previously, thus serving as a tool for review.

Texts that feature testimony related to war could be incorporated here. An example: *Dear America: Letters Home from Vietnam*, a collection of letters written by soldiers and family members during the war in Vietnam (also made into an award-winning documentary produced by HBO)

***Oral history project:** students could create questions based on their study of Arlington West and conduct interviews of soldiers, veterans and family members in their community.

***War memorial project:** students could research, compare and contrast war memorials in the U.S. and around the world.

Community film viewing and dialogue:** students could host a viewing of ***Arlington West at school, and based on their discussion of the film in class, students could co-facilitate a community discussion of the film.
